

## Modul - 2 : Tools to Work With SAP HANA Cloud

- Untuk membuka SAP HANA Cockpit dan SAP HANA Database Explorer, klik titik tiga di Instance yang sebelumnya sudah status Running.

The screenshot shows the 'All Instances' page in SAP HANA Cloud Central. A yellow banner at the top states: 'The Cloud Foundry Edition of SAP HANA Cloud Central is deprecated. The Multi-Environment Edition of SAP HANA Cloud Central is the recommended edition for managing SAP HANA Cloud instances. To use the Multi-Environment Edition of SAP HANA Cloud Central, follow the instructions [here](#).' Below this, a table lists instances. The 'MaxTravel' instance is in a 'Running' state. A context menu is open for this instance, displaying the following options: Manage Configuration, Open SQL Console, Copy SQL Endpoint, Copy Instance ID, Copy Configuration, Apply Patch, Upgrade, Stop, Delete, Open in SAP HANA Cockpit (To monitor and administer), and Open in SAP HANA Database Explorer (To develop and administer).

Status	Name	Notifications	Runtime Environment	Memory	Storage	Compute
Running	MaxTravel		Cloud Foundry	30 GB	120 GB	2 vCPUs
Starting	MaxTravelDL		Cloud Foundry		256 GB	2 vCPU Workers

- Tampilan SAP HANA Cockpit untuk melihat status Database User

The screenshot displays the 'Database Overview' page in the SAP HANA Cockpit. The page is divided into several sections: 'Monitoring' (showing 'Running' status for DBADMIN), 'Services' (All services are running), 'Alerts' (No current alerts), 'Memory Usage' (Used Memory, Resident Memory), 'Disk Usage' (Total 2,6 GB / 119,94 GB), and 'SQL Statements' (listing recent queries). A user menu is open in the top right corner, showing options: Recent Activities, Frequently Used, Settings, About, Manage Cards, and Sign Out. The user is logged in as 'mridhodnick11@students.usu.ac.id (origin: sap.ids)'.
